Subject: Willamette River Superfund Site

To Whom it May Concern,

As a resident of Portland, a mother, a medical professional and a concerned citizen, I was disappointed to hear about the Draft Cleanup Plan for the Willamette River Superfund Site. The so-called "Cleanup Plan" actually calls for very little cleanup or corporate responsibility.

I urge you to reconsider the Cleanup Plan and, when you do, to add the following elements to it:

1. Removal of, at least, 1,000 acres of polluted sediment from the Willamette River.
2. Enough cleanup to be able to safely remove the Fish Consumption Advisory within the next 10-20 years.
3. Toxic dredged sediments must be taken to an appropriate landfill.
4. Entities (read: corporations) with liability for the pollution must be held accountable and pay for a comprehensive cleanup that will protect the health of our communities, our environment and our wildlife.

Thank you,
